

Prairie Style Rolling Planters

A Handsome and Sizable Mobile Planter For Growing All Plants, Including Trees!

The prairie style rolling planter are shipped fully assembled. They are assembled in our workshop with locking wheels, thick agricultural pond liners and plumbed drain(s). The planters are built commercial grade tough to endure many years of continuous gardening with any soil of your choosing. Let your plants follow the sun, yearly, monthly, weekly, daily or be moved out of the way when you desire to carry out social activities, hobbies or chores.

This style of planters stand at 24.5" high height. 16.5 inches of this height provides a cavernous soil cavity and the remainder is provides a strong frame/chassis support and tall industrial wheels.

The cavernous cavity permits the growth of everything including: fruit trees, berries, bushes, tomatoes, peppers, deep rooting vegetables (carrots, beets, daikon), herbs, lettuce, asparagus rhubarb, etc. The planter comes in multiple length configurations: 3,' 4,' 6,' and 8' widths configurations: 2,' 2.5,' 3,' and 4.' Options include heights up to 39," self-watering system, irrigation feeds, stain finishes, trellises, slat screens, vertical growing supports and interconnecting benches/tables.

The rolling planters were designed to take back underused hardscape. Our larger planters provide the volume of up to six conventional large planters one might buy at a local nursery or box store. With real depths, great working heights, one or two boxes can grow the entire produce needs for an entire family. Multiple planters can be used to create mini farms for schools and restaurants. Rolling planters are designed for the serious/professional horticulturist and for those who want to make a difference in their lifestyles.

The planters are shippable through out the continental US and Canada via LTL Freight Carriers.
